

Finials for KBW BannerFlex Brackets

Custom finials, or decorative banner bracket arm ends, are manufactured by KBW/Consort for all of our KBW arms except the tapered "Airow®" arm.

KBW finials are made from flat-stock aluminum and are not spherical, as in the case of a typical round finial. There are two reasons for using this two-dimensional design. First, the banner hem will easily slide over the decorative finial without the need for removal, which would be necessary with a 3-dimensional finial. Second, because the KBW finials are permanently attached, they will not create a hazard by falling off.

Finials are custom cut from 12 gauge aluminum and can be any shape, including letters and numbers. For the shapes shown below, please allow 2 weeks from the order date for black powder coating and 3 weeks for special colors. Four weeks is necessary for custom orders that require both custom shapes along with a custom color.

Please contact a sales representative for more details and current pricing information.
